The Group Today

Access Intelligence is based in York with offices in Stockport, Greater Manchester, Chorley, Lancashire and Newcastle upon Tyne.

It is a compliance led Software and Computer Services group of companies providing business critical compliance and legislative driven services to both public and private sectors.

The software services are provided primarily as Software as a Service (SaaS) on a recurring revenue basis. Its principal software led services are:

The Virtual Compliance Officer™ which enables companies in the retail financial services sector to support their customer acquisition process whilst also ensuring that they comply with ever increasing regulations from the EU and the FSA.

mysatcom.net™ a compliance portal which enables companies in the general insurance and mortgage sectors to risk assess their businesses against FSA compliance requirements.

ProContract™ a suite of sourcing and procurement software which enables public sector bodies and private enterprises to demonstrate compliance and transparency when acquiring goods and services.

ProContract™ streamlines and reduces costs of tendering and contract management for both buyers and suppliers in the public and private sectors. The government has the objective that all public sector bodies comply with its directive to use methods such as electronic tendering for goods and services in order that it can meet its planned reductions in public spending.

The company's data management solutions include:

Backup & Running™ ensures secure encrypted online storage and management of data.

Starscan™ its anti virus and spam filtering managed service which prevents companies' servers being brought down by external virus attacks.

Starserver Monitor™ its managed support service which remotely monitors clients' servers and networks to ensure optimum availability.

The company's email archiving and high availability storage and retrieval systems, used by both private and public sectors ensure that information is available when required in a secure environment. They assist organisations in their need to comply with initiatives such as Sarbanes-Oxley and the Data Protection Act.

The company provides nationwide support services to both public and private sector organisations in the UK.
